# **Design Guidelines** for the Creation of **Public Transport** **Information.**

## **Appendix** (Reference Only)

1.1

# Information Panel.

## Horizontal Route Diagram

The horizontal route diagram is split into two lines - one for Irish and one for English. They are each to take up the same height as shown below, and have equal spacing.

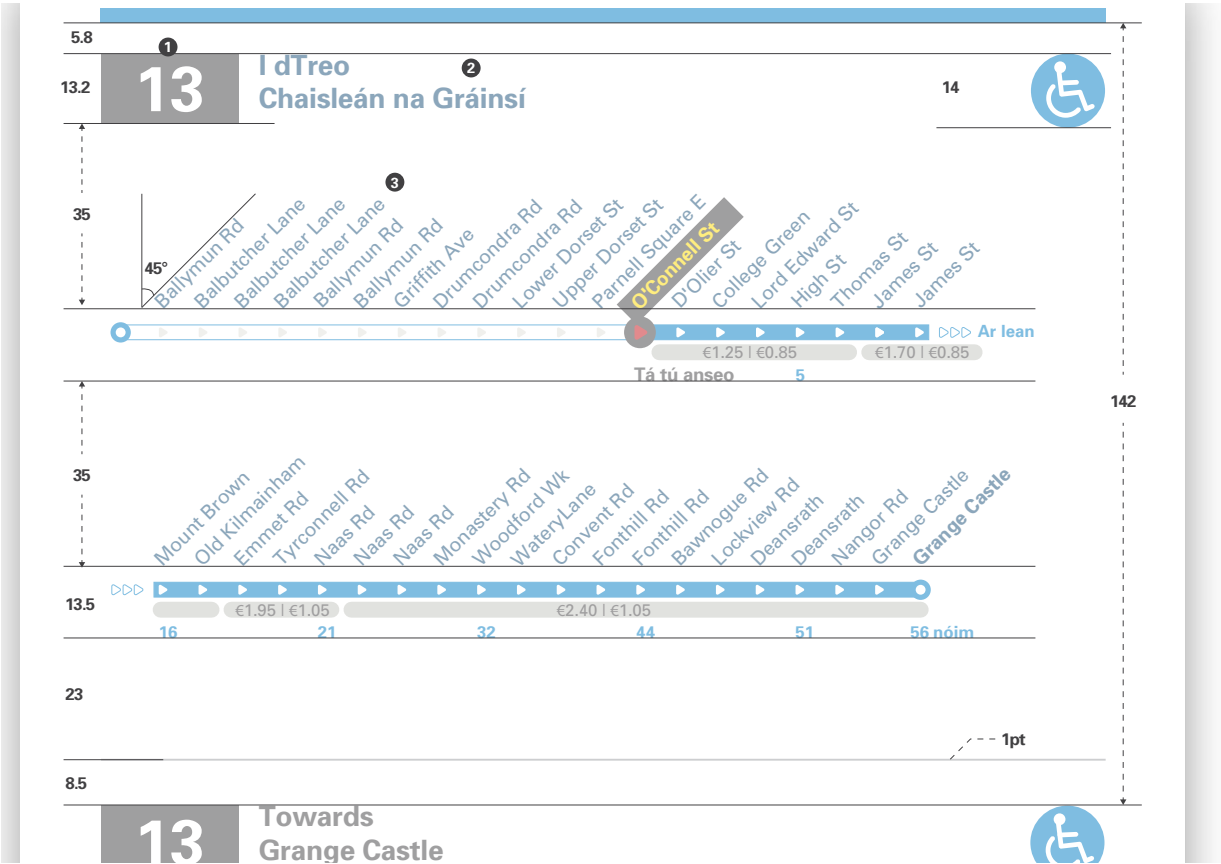

B\_IP.B6\_DB\_v1

B\_IP.A9\_DB\_v1

### Single Route Diagram

#### 1 Bus Route Number

34pt Bold, Tracking 0, White

#### 3 Stop Name

55pt Roman, Tracking -10, Irish C95 M70 Y30 K5, English 90% Black

#### 2 Directional Information

15pt Bold, Tracking -10, Irish C95 M70 Y30 K5, English 90% Black

## 1.1

## Stop Name and Fare

## ④ Current Stop Name

10.5pt Bold, Tracking -10, M10 Y100

## ⑤ Text 'Continued'

9pt Bold, Tracking 0, C100 M40

## ⑥ Fare Information Text

9pt Regular, Tracking -10, 90% Black

## Fare Information Box

Y10 K65

## ⑦ Departure Note

10pt Bold, Tracking -17, 90% Black

## ⑧ Arrow Colour

Y5 K20

## Arrow and Hub

1.2

# Colour Palette. Colour By Route

The use of multiple colours to represent different routes has been developed as an alternate version to the recommended principle of colour by mode detailed in the primary Design Guidelines.

To ensure good legibility and colour contrast, consideration must be given to the order and choice of colours used in each application.

These principles can be applied to the following templates:

- B\_IP.A4\_DB\_v1
- B\_IP.A4\_BE\_v1
- B\_IP.A5\_DB\_v1
- B\_IP.B3\_BE\_v1
- B\_IP.B3\_DB\_v1
- B\_SH.A2\_v1
- B\_SH.A3\_v1
- B\_SH.B2\_v1
- B\_SH.B3\_v1
- B\_SH.C2\_v1
- B\_SH.C3\_v1
- B\_ST.A2\_v1
- OS.A2\_v1
- OS.A3\_v1
- OS.B2\_v1
- OS.B3\_v1
- R\_ST.A1\_v1
- R\_ST.A2\_v1
- R\_ST.B1\_v1
- R\_ST.B2\_v1
- R\_ST.C2\_v1
- R\_ST.C3\_v1
- R\_ST.C5\_v1
- RB\_ST.1\_v1
- L\_SH.A1\_v1

**Correct Palette**  
Please use these specific colours for the route diagram.

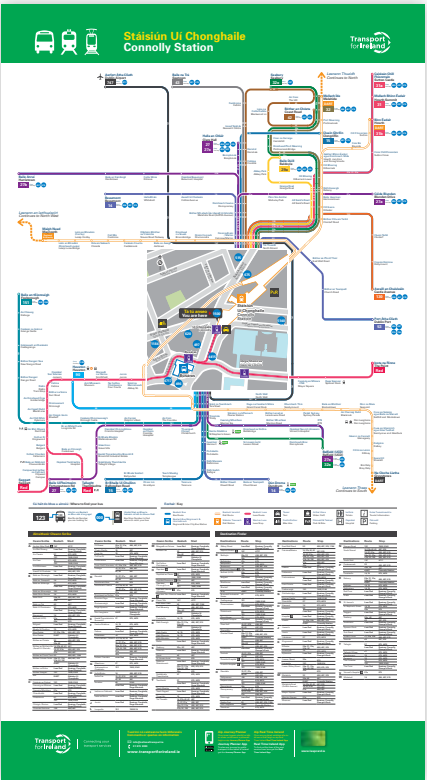

**Correct Order**  
The colours in the multi route diagrams should be kept in the order shown left as much as possible.

1.3

Multiple colours can be applied to network diagrams and route name boxes as shown right.

For further details, please refer to the primary Design Guidelines document Section 4.4.4 on Network Diagram.

OS.A2\_M\_v1

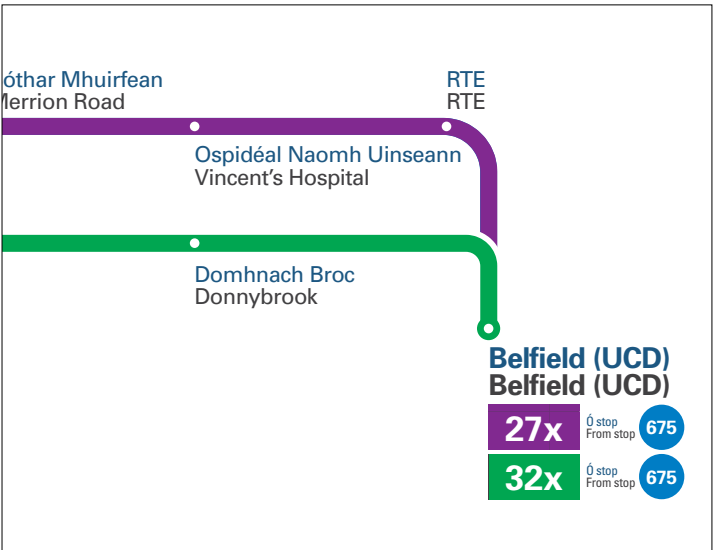

# Colour Palette.

## Application: Network Diagram

### Route Lines

**Route Style**  
Alternative line styles have been applied to differentiate different modes of transport. DART routes have a single white line through the middle, LUAS routes have a double white line, and Bus routes are solid.

**Route Name Boxes**  
The boxes that house the transport route numbers and names should always match the corresponding route colour.

## 1.4

## City Network Diagram Panel.

### Colour by Mode

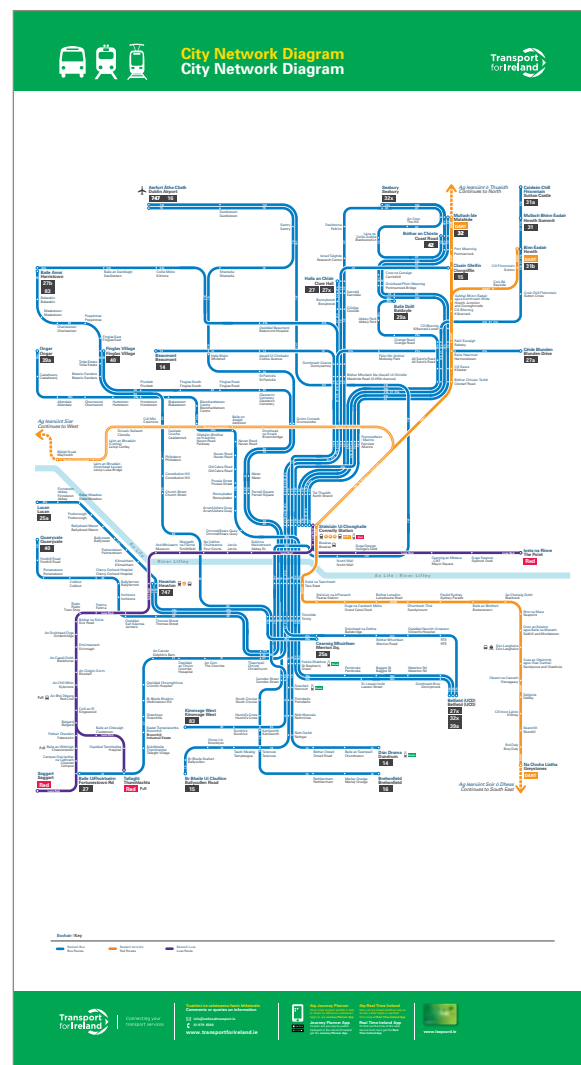

City Network Diagram is a non-location specific template that shows generic transport network information of a city.

This template is to show main routes and services of each transport mode with geographic references including river, direction of routes and positions of final destinations.

You can use this template for appropriate panels in varied dimensions, please refer to panel specifications in section 4.4.2 for Bus panels, section 5.2.2 for Rail panels and section 6.2.2 for Luas. Also it can be used in different media and at various scales, online, paper, leaflet etc.

However, care and consideration for font sizes and legibility of information must be carefully reviewed and tested by qualified team.

#### City Network Diagram

Due to complexity of information and diagrams of City Network Diagram, the use of Multiple Colours (Colour by Route) is recommended and Colour by Mode option is also available for varied situations.

## 1.5

# City Network Diagram Panel.

## Header & Footer

Header and Footer layout shown below is to be applied consistently throughout City Network Diagram Templates.

\* Please note that all dimensions shown without measure reference are in **mm**

### Visible Area Border

Header spacing shown below applies from visible area border.

### 1 Transport Mode Icons

Icons of all transport modes shown on the City Network Diagrams are to be included on the header in White

### 2 Title

50pt Bold, Tracking 0, Irish M10 Y100, English White

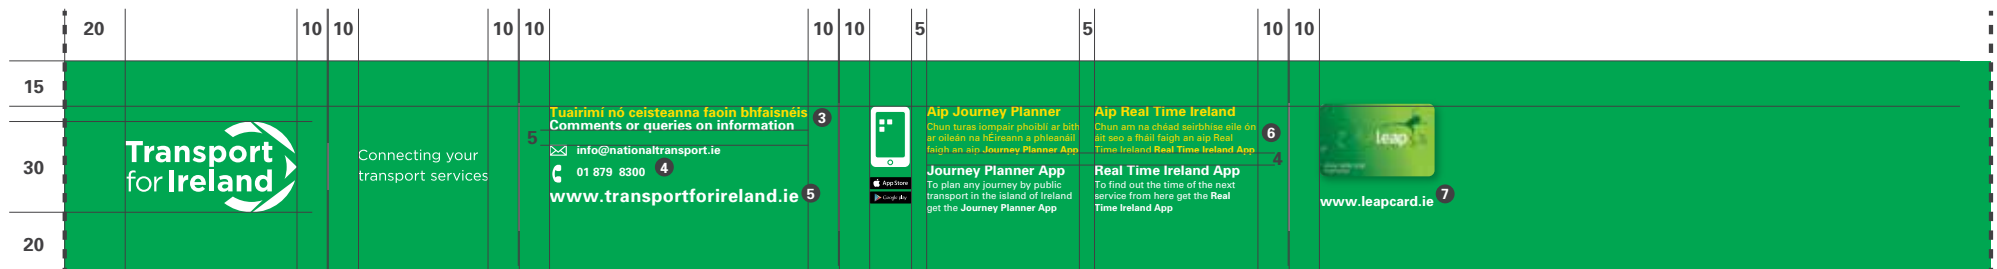

3 13pt Bold, Tracking 0, Irish M10 Y100, English White

4 11pt Bold, Tracking 0, White

5 17pt Bold, Tracking 25, White

6 9pt Regular, Tracking 0, Irish M10 Y100, English White

7 13pt Bold, Tracking 5, White

## 1.6

**City Network Diagram Panel.**

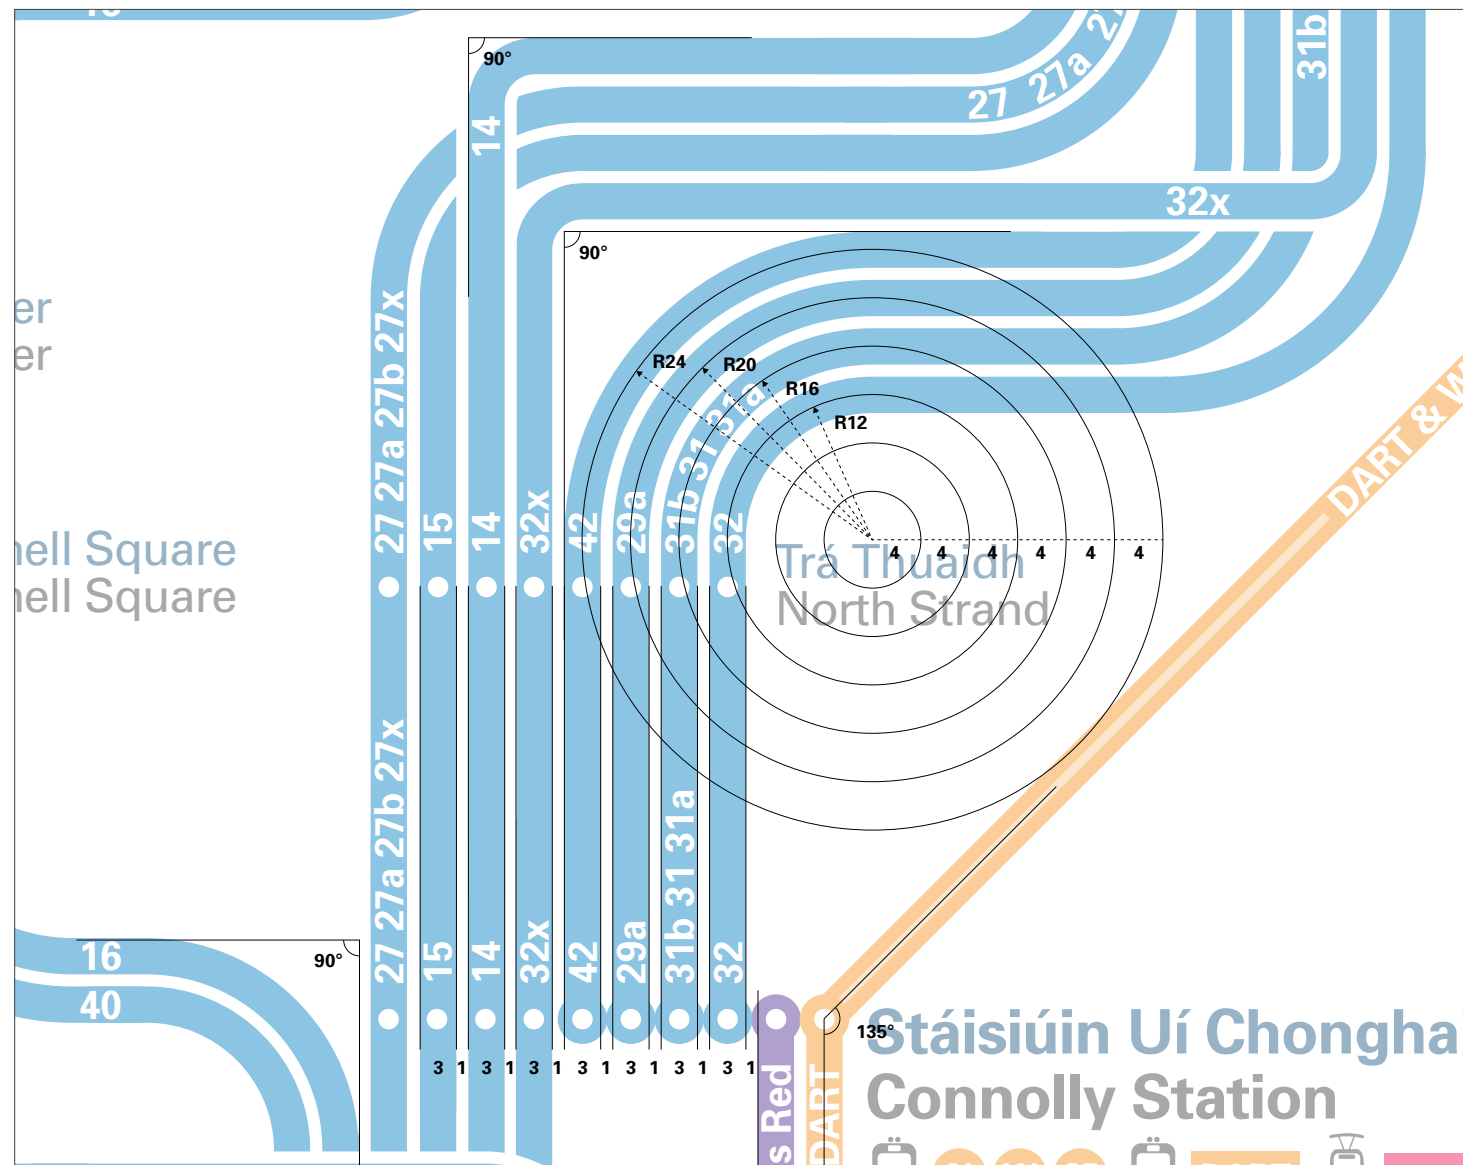

## Network Diagram

Many of the spacing rules for the Network Diagram specify a minimum distance, in these cases you can use any distance as long as it is greater than the guidelines.

The spacing of elements on Network Diagrams should be considered as a whole.

Route angles used in the Network Diagram are primarily based on 90° and 45° as shown right.

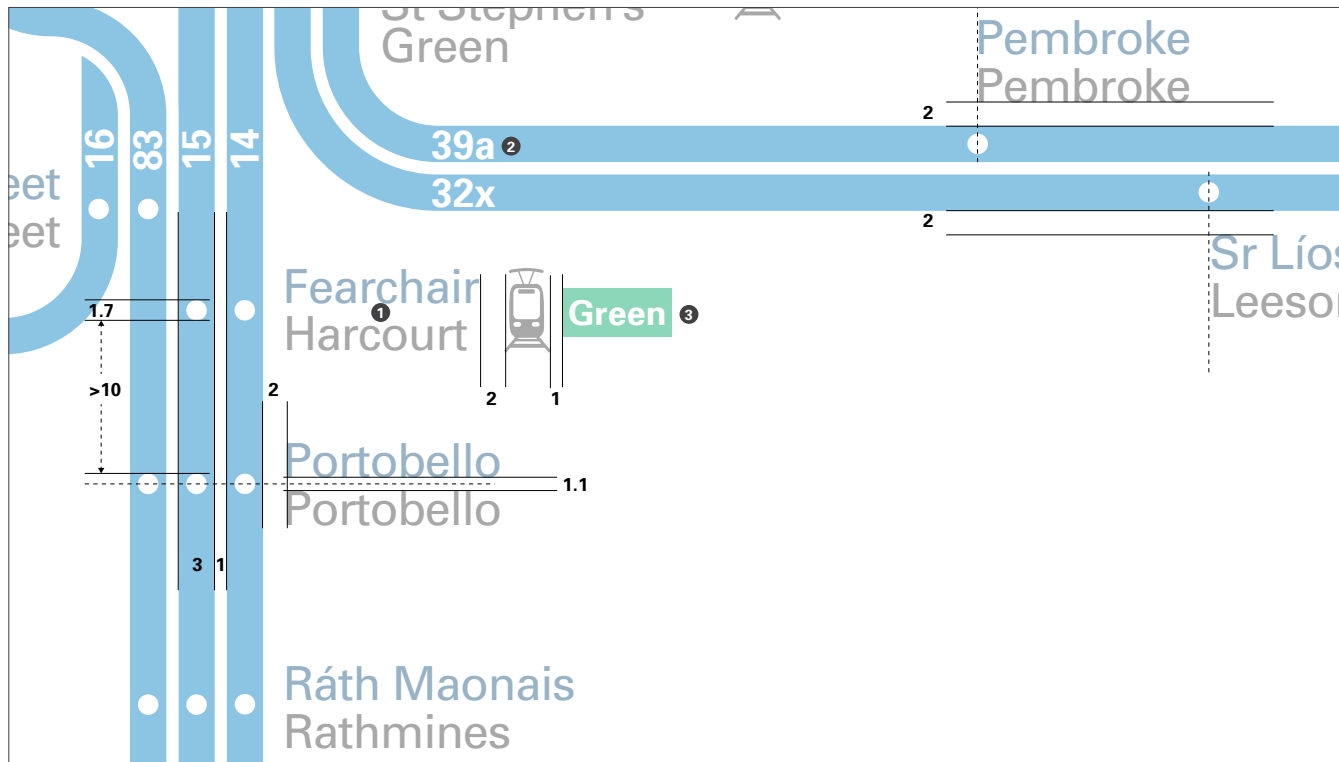

\* Please note that all dimensions shown without measure reference are in **mm**

**City Network Diagram**

## 1.6

## Stop Name and Stop Dot

**① Destination Name**

11pt Regular, Tracking -25,  
Irish C95 M70 Y30 K5, English 90% Black

**② Route Number on Diagram**

9.5pt Bold, Tracking 0, White

**③ Interchange Text**

8pt Bold, Tracking 0, White

This applies to all interchange information text

## 1.6

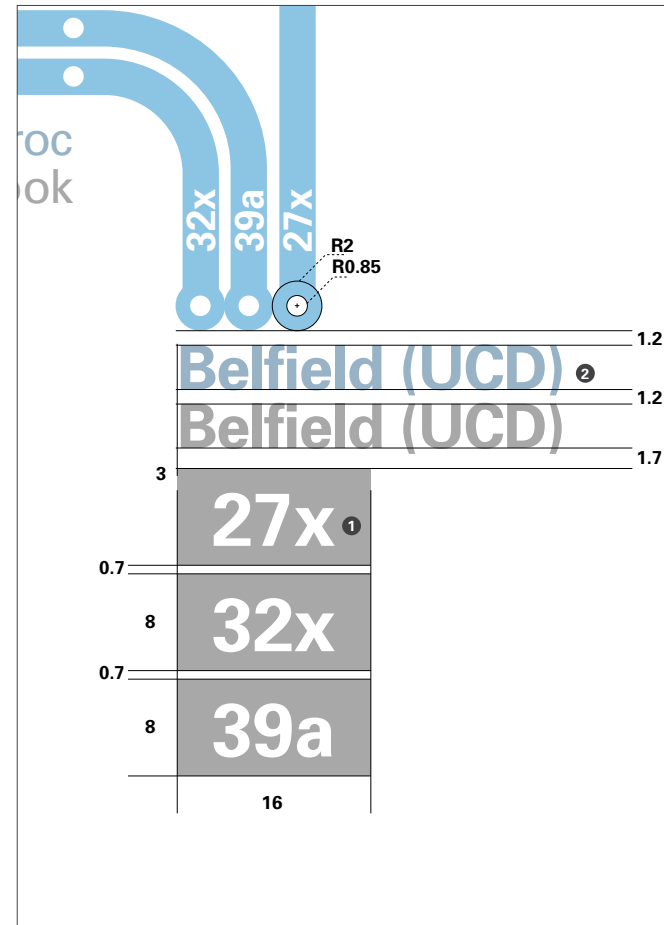

## City Network Diagram Panel.

### Network Diagram

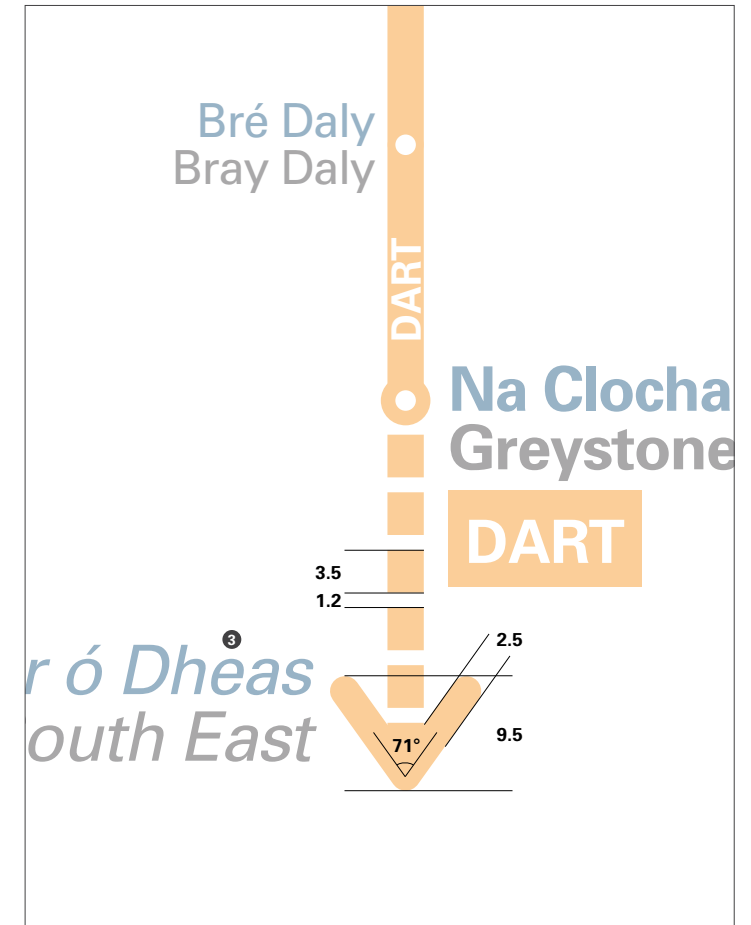

\* Please note that all dimensions shown without measure reference are in **mm**

- ❶ **Route Number**  
17.6pt Bold, Tracking -10, White
- ❷ **Terminus Name**  
14.4pt Bold, Tracking -25,  
Irish C95 M70 Y30 K5, English 90% Black
- ❸ **Further Directional Information**  
16pt Regular Italic, Tracking -25,  
Irish C95 M70 Y30 K5, English 90% Black

#### Final Destination

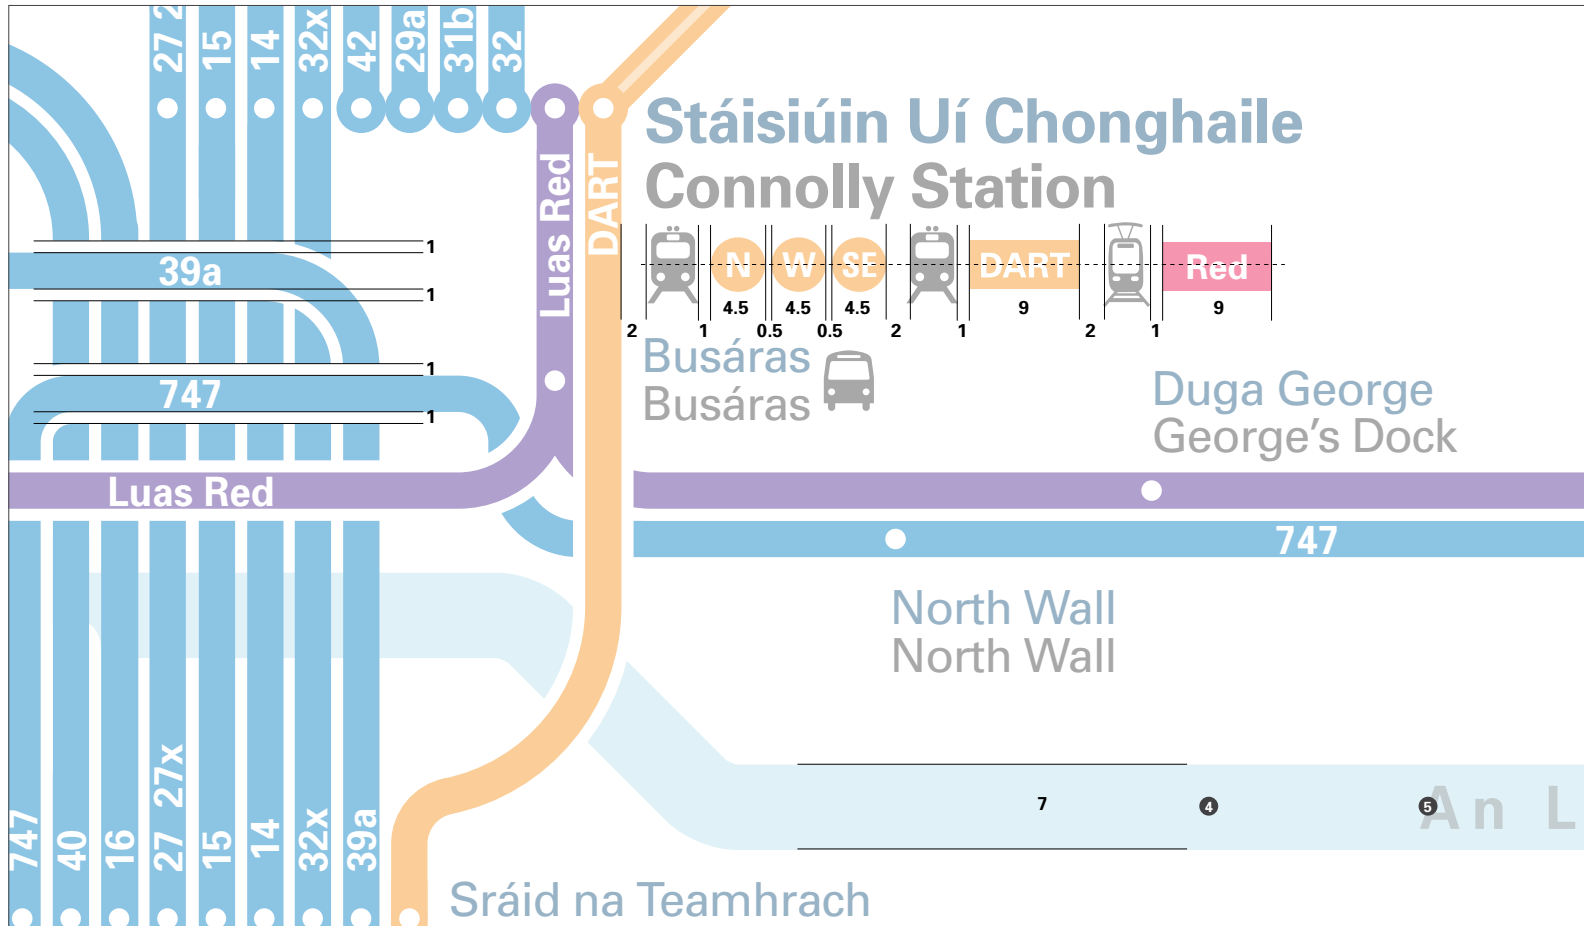

#### Directional Details

## 1.6

## Spacing &amp; River

## 1.7

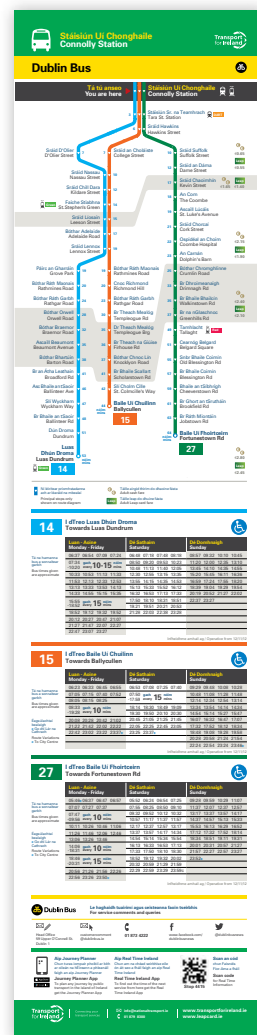

Multiple colours can be applied to multi route diagrams and route name boxes on Bus Pole Information Panels as shown right.

For further details, please refer to the primary design guidelines document Section 4.3.5 on Route Diagrams.

## Colour Palette.

### Application: Multi Route Diagram

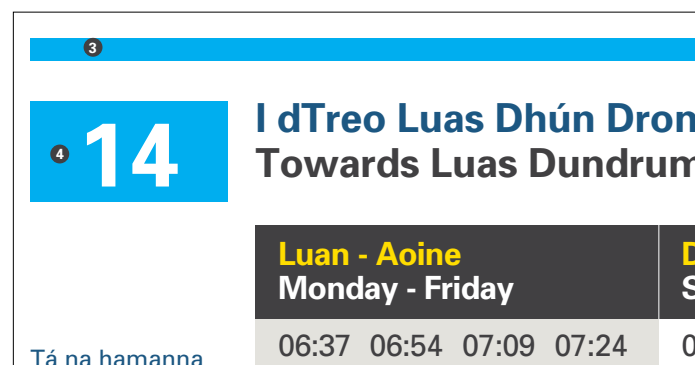

#### Route Lines

#### Route Colours

In order to distinguish between different routes, each route has its own colour and should be applied to the following:

- 1 Bus Route
- 2 Bus Route Box
- 3 Separating Line
- 4 Timetable Route Box

B\_IPA4\_M\_DB\_v1

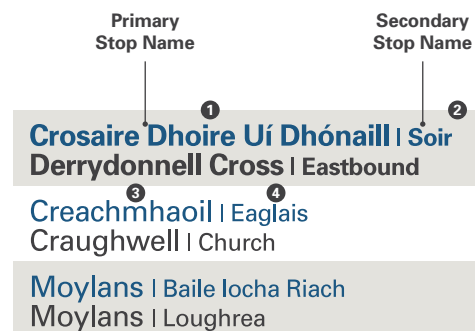

## Timetable.

Timetable Type 2-1 layout shown right is based on Timetable Type 2 in the primary Design Guideline and can be used when double stop names need to be shown.

Timetable Type 2-1 shows double stop names, location specific departure times and destination arrival times and should be used for rural, regional or intercity services.

This page only specifies modified layouts and elements from Timetable Type 2 and the rest are same as shown in section 4.3.8 in the primary Design Guideline.

\* Please note that all dimensions shown without measure reference are in **mm**
